- RTI Itaware - Infordata with Oracle technology.

The indicative estimated value of the Framework Agreement, representative of the summation of the maximum presumed amount of the specific Contracts/Orders that will be entrusted by virtue of the same Framework Agreement, is equal to Euro 390.000.000,00 (three hundred and ninety million/00 €), and the duration of the Framework Agreement is 24 months, for specific contracts with a maximum duration of 36 months.

Being present among the actors of this initiative, reinforces the transformation process already undertaken for some time by the Digital Value Group, alongside and in support of the digital transformation strategy of the Public Administration.

Transformation that cannot but pass through the adoption of the Cloud paradigm as a digital "booster" of the Country System, enabling a real revolution in the way of thinking about the processes of delivery of PA services to citizens, professionals and businesses and, last but not least, enabling factor to :

- Generate value towards the end user ;
- Introduce innovative operating models;
- Optimize infrastructures.

Massimo Rossi, President of Digital Value, comments: *"This award rewards the efforts undertaken in the transformation path of the Group that I represent; we are proud to be able to help the Country system in the difficult path of the PNRR and the implementation of the strategic lines provided by the Digital Administration Code".*
